Capability Statement

At Poolbrook Contracting, Inc it is our goal to partner with our clients to complete our work efficiently and bring solutions to difficult installations. We seek out projects that are complex and require planning and organized execution. Our work includes:

- Wastewater treatment plant equipment installations
 - Clarifiers
 - Rotating Biological Contactors
 - Blowers
 - Grit removal systems - screens, vortex, separators
 - MBR systems
 - Slide Gates
 - Large diameter mechanical pipe
 - Valves
- Site Work
 - Large Area (Solar field) mowing and maintenance
 - Access Road and driveway installations
 - Excavation and drainage installation

Our company strives to bring a complete package of contract administration and execution to each and every project. Using our years of experiences of the understanding the contractual requirements of the work being performed we are able to begin the project with the knowledge of what is required to complete that project through closeout. Our union millwrights are trained in the necessities of installing precise equipment and take pride in the knowledge that each piece of equipment will perform as it is intended when the job is complete.
